FEATURES & BENIFITS :

Spill Berms are an essential tool for chemical spill control. They are designed to provide effective temporary secondary containment for spills, sealing them off from the environment, nearby drains, and doorways. aprons as well as disposal waste bags are provided for proper disposal.

All of our Spill Containment Products have been carefully developed to capture drips and prevent slips. Keep employees safe, and provide a robust physical barrier to prevent potentially harmful fluids from escaping into the environment - this means they prevent potentially expensive clean up operations, both to the environment and to your reputation.
