

Andel CloudConnect®

Wi-Fi enabled, property management leak detection system with dedicated web portal

Smart leak detection – connected, compact and designed for residential risk management

Andel CloudConnect® is a compact, Wi-Fi-enabled leak detection device that delivers instant alerts to help prevent costly water damage and disruption. Battery-powered and easy to deploy, it is ideal for estates of any size and can be managed remotely via a secure online portal.

Perfect for social and private landlords, as well as managers of multi-occupancy or individual residential properties, Andel CloudConnect® offers a smart, proactive approach to leak detection, enhancing asset protection, reducing insurance claims and supporting sustainability.

How it works

Each CloudConnect® device is fitted with probes and terminals for optional external sensors. Devices are connected to the building Wi-Fi network and assigned to zones via the Andel CloudConnect® app.

When the probes come into contact with water, alerts are sent instantly to users.

Landlords and estate managers can monitor multiple devices across their portfolio via the secure web portal – with access levels for installers, owners and tenants.

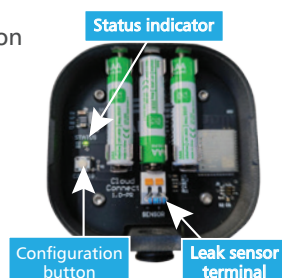

Status indicator and configuration

Flashing status indicator

- Slow flash: waiting for Wi-Fi connection
- Fast flash: transferring data
- Double flash: ready for setup via app

Configuration button

- Single press: wake up device
- Double press: erase Wi-Fi settings
- Hold for 5 seconds: full factory reset

Why choose Andel CloudConnect®?

- **Real-time protection** – sends instant email and push alerts when water is detected
- **Cloud-enabled** – manage and monitor multiple devices and sites via web portal or mobile app
- **Easy to install** – no cabling, mains wiring or external power needed
- **Long-lasting** – battery powered with 1+ year life (alkaline or rechargeable)
- **Compact and discreet** – small form factor for easy placement in leak-prone areas
- **Flexible zoning** – assign devices to specific flats, rooms or plant areas for fast response
- **Compatible with Flexi-Pad®** – connect to Andel's external Flexi-Pad® sensor for wider or hard-to-reach leak detection coverage
- **Low maintenance** – just replace batteries when needed
- **10-year warranty** – at no extra cost
- **Ideal for all residential settings** – social housing, private rented sector, student housing, care homes and private residences

TECHNICAL OVERVIEW

Power: 3 x AAA batteries (alkaline or rechargeable)

Battery life: 1+ years

Dimensions: 80mm × 80mm × 30mm

Connectivity: Wi-Fi/App-based Bluetooth setup

Sensors: Integrated leak detection probes

External sensor compatibility: Terminals for additional leak detection devices – Andel Flexi-Pad® or Point Sensor

Status LED: Visual connection and setup feedback

Mounting: Freestanding or fixed in place

Alerts: Real-time push/email notifications

Making water sustainable for
a cleaner and safer environment.

Simple, secure and intuitive monitoring

The Andel CloudConnect® web portal gives users a clear overview of all connected devices across multiple properties.

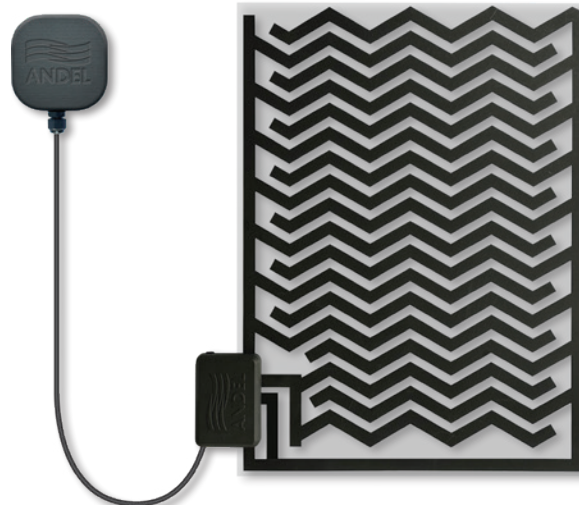

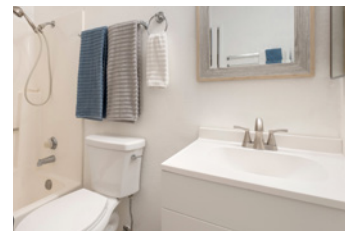

These example screens provide a snapshot of the intuitive interface used for zone management, real-time alerts and estate-wide visibility.

Extend your reach with Flexi-Pad®

For added coverage in concealed or high-risk areas, CloudConnect® can be connected to Flexi-Pad® – Andel's flat, flexible sheet designed for liquid leak detection in narrow voids such as under appliances or raised floors.

Flexi-Pad® is ideal for placement under washing machines, dishwashers, baths, showers and any other risk area or appliance or that uses running water in a home or commercial setting.

Andel CloudConnect® paired with Flexi-Pad® – ideal for underfloor, narrow void and hard-to-reach leak detection.

Simple, cost-effective subscription

The Andel CloudConnect® fully-managed package is available on an affordable ongoing subscription, giving you full access to the web portal, mobile alerts and device management tools.
